Part 1 - Evaluation of Significance

1. Owner of record: Calder Works Owner LLC, a Virginia limited liability company, acting by its duly authorized signatory, which certifies that it holds fee simple title to the property described below and has authority to make this application.

2. Property: the former Calder Shoe Company works, 1200 Commerce Street, Lynchburg, VA 24504, situated within the boundaries of the Lower Basin Historic District as listed in the Virginia Landmarks Register and the National Register of Historic Places.

3. Request: a determination, for each structure identified in Section 5, as to whether the structure contributes to the significance of the registered historic district for purposes of Section 47 of the Internal Revenue Code.

NPS - DETERMINATION ISSUED
June 12, 2023
See Section 5, p.3

Section 1 - Description and significance

1. Building A is a four-story brick factory with a reinforced concrete frame, steel sash windows and a fired-clay cornice and frieze along Commerce Street.

2. Alterations within the period of significance include the 1931 freight elevator addition; later alterations are limited to infilled loading bays on the river elevation.

Section 5 - Determinations by structure

5. The complex consists of three structures on a single tax parcel, historically operated as an integrated shoe manufacturing works under common ownership until 1958, when production ceased and the property passed to a succession of warehousing tenants.

6. Of the three structures, the two reinforced-concrete-frame masonry factory buildings erected in 1924 and 1928 (identified in this application as Buildings A and B) retain integrity of location, design, setting, materials, workmanship, feeling and association sufficient to convey the significance of the district, and are determined to contribute to that significance.

7. The single-story concrete-block annex erected in 1968 (identified as Building C) post-dates the close of the district's period of significance, lacks the materials and workmanship characteristic of the contributing resources, and is determined to be non-contributing; accordingly, Building C is not a certified historic structure within the meaning of 36 CFR 67.2, and costs attributable to it are outside the scope of any certification issued for the complex.

Section 2 - Description and significance

2. Building B is a five-story brick building organized around a central light court that admitted daylight to the lasting and finishing rooms on every floor.

3. The period of significance runs from 1924 to 1958, the years of continuous shoe production by the Calder Shoe Company.

Section 3 - Description and significance

3. Alterations within the period of significance include the 1931 freight elevator addition; later alterations are limited to infilled loading bays on the river elevation.

4. Photographs 1 through 22, the site plan and the district map are attached and are incorporated into this application.

Section 4 - Description and significance

4. The period of significance runs from 1924 to 1958, the years of continuous shoe production by the Calder Shoe Company.

5. The applicant certifies that the information provided is correct to the best of its knowledge and belief and understands that falsification is punishable under 18 U.S.C. 1001.

Section 5 - Description and significance

5. Photographs 1 through 22, the site plan and the district map are attached and are incorporated into this application.

6. Building A is a four-story brick factory with a reinforced concrete frame, steel sash windows and a fired-clay cornice and frieze along Commerce Street.

Section 6 - Description and significance

6. The applicant certifies that the information provided is correct to the best of its knowledge and belief and understands that falsification is punishable under 18 U.S.C. 1001.

7. Building B is a five-story brick building organized around a central light court that admitted daylight to the lasting and finishing rooms on every floor.
